# The Church and Christian Education.

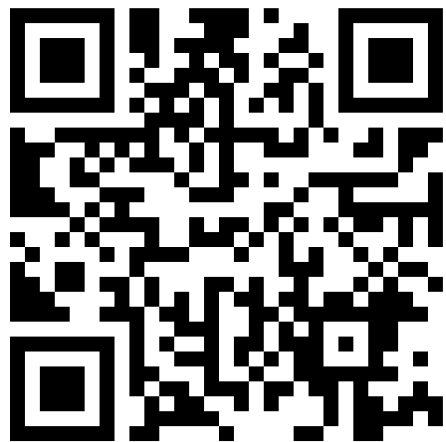

- Historically, the church has been at the forefront of education.
- Europe's first education revolution, 7<sup>th</sup> century. The church is instrumental in establishing places or learning.
- Second education revolution: The Reformation. Luther understands as a kingdom of priests, the populace need to be able to read!

# Europe is in an educational dark ages yet again...

"A new dark age has descended upon the world. Secularisation has robbed teachers of the respect that the church had bestowed upon them. Teaching is no longer a sacred called... In the absence of divine revelation, universities no longer know what is logic or language, the difference between right or wrong, male or female, marriage or family, nation or justice, self and God: **an intellectual revolution is required to restore the soul of education.** Learning must earn public respect as a pursuit of truth and virtue."

***The Third Education Revolution by Vishal Mangalwadi, Christian Philosopher***

# The Remedy....

- True Christ-centred Education
- An education that focuses on what is true, beautiful, and good. (Philippians 4:8)
- Educating the whole person: mind, body and soul.

# A 21<sup>st</sup> Century Education Rooted in 1<sup>st</sup> Century Truth

- Home education allows parents to gain control of their child's education and moral formation.
- Arise Home Education partners with families to help them do this.
- Leveraging technology to bring a Christ-centred education to teens.

# Arise Home Educations' Approach to Online Learning: SAMR Method

## **Substitution**

Technology acts as a direct substitute for traditional methods.

## **Augmentation**

Technology improves the traditional approach.

## **Modification**

Technology allows for significant task redesign.

## **Redefinition**

Technology enables new tasks previously inconceivable.

# Arise Live Classes In Action: British Literature

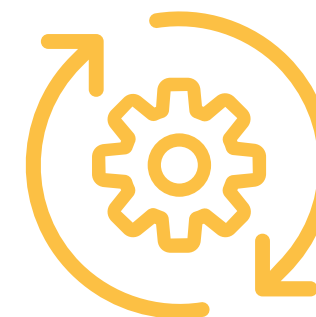

Project

As a Christian thinker and writer, Lewis was revolutionary in the way he embraced new technology to communicate with wider society. Lewis used the radio to initially broadcast *Mere Christianity*, this brought the message of the gospel to a wider audience.

His *Narnia* books were bestsellers, and brought the message of the Gospel to a whole generation of children, not only in this country but across the globe.

Consider modern culture, how might the church engage with people outside the church with the message of the gospel?

# Arise Live Classes In Action: Logic

Arise Home Education

Published by Agnes Ferguson Mitchell

- a day ago -

In Logic this week we looked at - identifying the underlying premises of an argument. You can't really assess or properly respond to a statement or argument, until you figure out all the premises that the person is building their argument on. Once you have clarified the underlying premises you can easily build your response. We went through stacks of simple arguments and identified the hidden premise(s), and then moved on to some more weighty ones. The teens did amazing at rooting out what was behind some quite lofty sounding arguments, breaking them down to their component parts, which they then quite easily refute.

## What is the underlying premise?

That scientists don't have biases and are totally open minded (this is not generally accepted - everyone has biases).

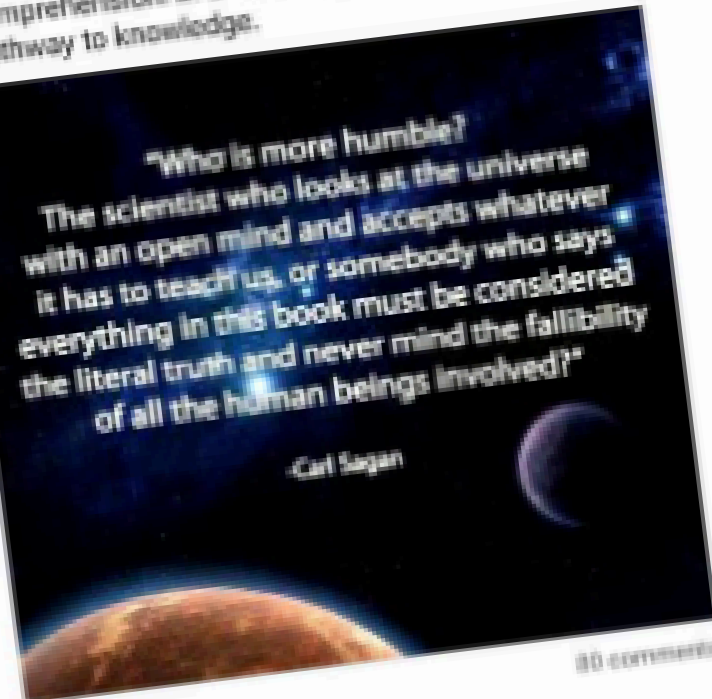

That religious people aren't able to do science. (This is easily refuted by looking at the number of great scientists who have been religious).

That Christians accept the Bible to be true without evidence (there are stacks of evidence to back up the authority of the bible).

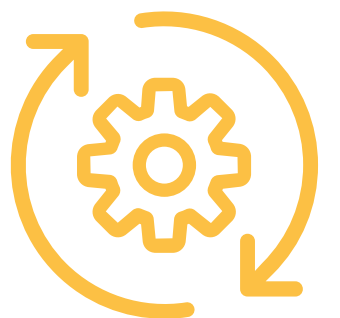

...comprehension. In this sense, humility becomes a pathway to knowledge.

"Who is more humble?  
The scientist who looks at the universe  
with an open mind and accepts whatever  
it has to teach us, or somebody who says  
everything in this book must be considered  
the literal truth and never mind the fallibility  
of all the human beings involved?"

-Carl Sagan

# Testimonial

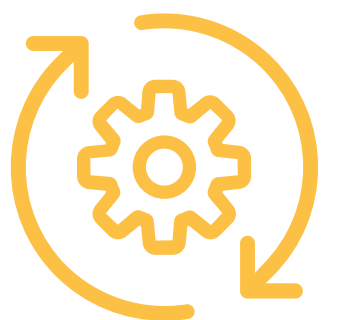

Honestly, this class has changed my son! All for the better. He can now have meaningful discussions on topics (even controversial ones) without feeling attacked by a different opinion. He can organise his thoughts better and express himself in a way that makes better sense than before the class. Thank you, Agnes Ferguson Mitchell, for your dedication and passion for teaching our future leaders. Here's to more awesome dinner conversations!

# Arise Offers Faith Based Science

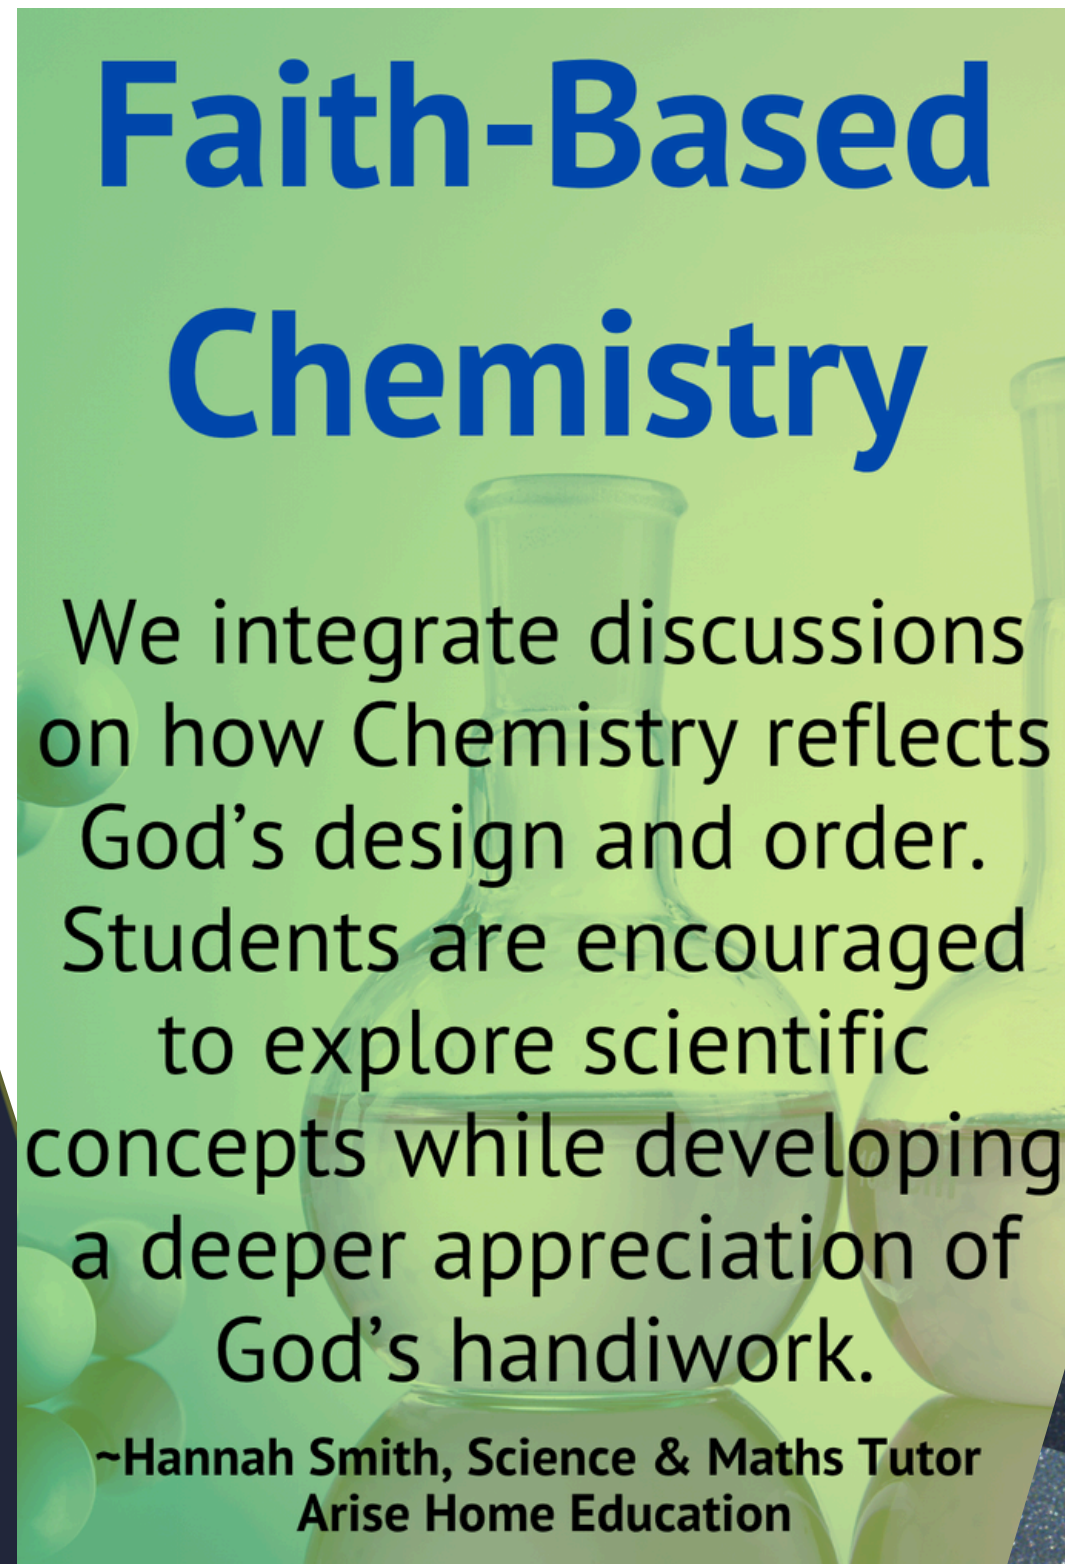

The cover for the Faith-Based Biology course features a magnifying glass, a blue thistle, and a brown butterfly on a textured background. A yellow circular button with a hand icon and the text 'REGISTER NOW' is in the top right corner. The title 'Faith-Based Biology' is in large white letters on a dark blue background. Below it, a paragraph describes the 2-year iGCSE curriculum. The website 'AriseHomeEducation.com' is at the bottom.

**REGISTER NOW**

## Faith-Based Biology

Our 2-year iGCSE curriculum explores life science. It is specifically tailored to align well with a Christian worldview, emphasizing God's creation throughout the course.

The cover for the Faith-Based Chemistry course has a green background with a faint image of laboratory glassware. The title 'Faith-Based Chemistry' is in large blue letters. A paragraph explains the integration of faith and science. A quote from Hannah Smith, Science & Maths Tutor at Arise Home Education, is at the bottom.

## Faith-Based Chemistry

We integrate discussions on how Chemistry reflects God's design and order. Students are encouraged to explore scientific concepts while developing a deeper appreciation of God's handiwork.

~Hannah Smith, Science & Maths Tutor  
Arise Home Education

The cover for the Exploring The Heavens course features a starry night sky background with a telescope in the bottom right. The title 'Exploring The Heavens' is in yellow, and 'Studying GCSE Astronomy' is in white. A paragraph describes the course's focus on discovery and awe. A quote from Hannah Smith, Astronomy Tutor at Arise Home Education, is at the bottom.

## Exploring The Heavens

Studying GCSE Astronomy isn't just about passing an exam—it's about discovering the heavens and growing in awe of the Creator.

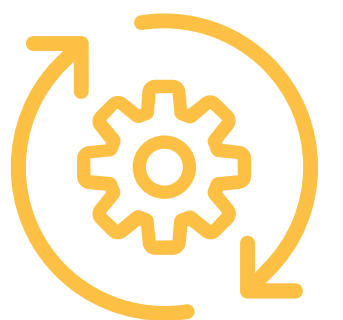

~Hannah Smith, Astronomy Tutor

# Testimonial

**"I just wanted to give you a testimonial for Arise from a parents perspective - We have used many online course providers, some of them much more expensive than Arise. Never before have our kids had the amount of personal attention and support. If our kids are struggling or getting behind we hear about it right away and are able to course correct. With math the teacher messages if she notices one of my kids was struggling with a particular topic and has offered to do a one on one zoom to help them build their confidence. This has never happened with another course provider, usually we don't hear from them from one end of the year to the other except to ask for payments, and there is not this kind of individual care." ## Improved Skills

Thank you so much! Really enjoyed having my daughter in your class. She was definitely stretched to grow in her research skills and her time/work management skills. Thank you for your investment of time and energy into the class. Grateful for you! ~M. P.

## Satisfaction

Our son always says he has learned something and looks forward to the lessons each week. ~S.C.

## Intention

"I think this class can be used for anyone in high school and EVEN adults could use this class. These skills are so overlooked nowadays. Thank you for being such an amazing tutor and helping us reach our goals! ♥ ~S.B., S6
